What?
When?
How?
Q & A
LLM in Medical Ethics & Law

★ Who?

★ The Centre for Medical Ethics & Law (CMEL)  
https://www.cmel.hku.hk

★ About the Centre, the Faculty of Law, and the Faculty of Medicine

★ Groundbreaking cross-disciplinary programme, focus on law, policy, clinical and research ethics and social issues

★ Offered by the Faculty of Law of the University of Hong Kong – a Master of Laws programme, but one designed for doctors, lawyers and others
LLM in Medical Ethics & Law

Why?

- Medical science and medical technology is changing rapidly
- The role of physicians and the organizational context in which they work is also changing
- Legal responsibilities of hospitals, healthcare maintenance organizations, insurers and other institutional stakeholders?
- Legal responsibilities of other professionals in the healthcare sector, such as dentists, pharmacists and nurses?
LLM in Medical Ethics & Law

Why?

- The public is more educated than in the past, access to information (good and bad) more readily available, patients expect more
- Impact of modern doctrines such as patient autonomy and right to self-determination
- And their impact on the rapidly changing law – cf recent dramatic changes in the law relating to consent in 2015
- Will current legal assumptions favouring the medical professions (the ‘Bolam Rule’) change?
LLM in Medical Ethics & Law

Why?

- Professionals should engage the wider public in addressing concerns/fears that new science generates.
- Such informed dialogue hopefully leads to better policy guidance and implementations of regulations, laws, etc.
- To better equip healthcare professionals with the tools to take ownership and leadership in shaping guidance and regulation in their own fields for the future.
LLM in Medical Ethics & Law

Why?

- New technologies lead to new legal paradigms: in the age of large-scale electronic medical records (EMR) databases, the imminent advent of the widespread application of precision medicine and whole genome sequencing in clinical practice, what new legal responsibilities for doctors / institutions?
- And for researchers? Data custodian obligations?
- A better understanding of the law leads to greater confidence in professional practice, gives clarity on how and why the law operates as it does, and how to have the law on your side
LLM in Medical Ethics & Law

★ For?

★ Lawyers (HKU LLB with at least 2\textsuperscript{nd} class honours or equivalent)
★ Doctors (HKU MBBS or equivalent)
★ Professionals in relevant fields: ‘degree in a discipline other than law or medicine’ with at least 2\textsuperscript{nd} class honours or equivalent qualification AND ‘have at least two years of relevant experience and professional qualifications’
★ Non-local grads may need to satisfy current Faculty of Law requirements for TOEFL / IELTS
LLM in Medical Ethics & Law

**What?**

- ONE-year full-time / TWO-year part-time
- 6 core modules + minimum of 3 electives (for total of 72 – 78 credits)
- Of the 3 electives (or equivalent), at least one must be a law elective, and one non-law
- Electives: Faculty of Law, the School of Public Health, and the Department of Social Work & Social Administration
What?
